The Online Document Vault
for Professionals and Individuals

<https://www.kycme.com>

Overview

KYCme The online vault for professionals and individuals, authenticating and storing highly valued documents that can be accessed securely anytime, anywhere.

KYCme The leading online storage solution that is AML and KYC compliant, thanks to our unique authentication solution.

KYCme can hold any type of documentation you want to upload - from passport to driving license, insurance documents to your CV. Once uploaded in PDF format, and the relevant authentication process being completed, the documentation is there for you to access online, around the clock. We will never share your data or documentation with anyone without your permission.

It is good practice to safeguard your home and office documents in a safe and secure site. It is essential nowadays to protect your documentation and prevent fraud.

for Individual Customers

From passports to bills, certificates to policies, KYCme encrypts and stores your valuable documents online, providing peace of mind and speedy solutions.

Next time you need to open an account, change your mortgage or simply want to put your hands on your valuable documentation, you can simply log in to your highly secure online vault and retrieve the material you need.

KYCme is the perfect solution for storing authenticated and valuable documents. An online solution, it means you can login anytime, anywhere.

There are endless benefits to signing up, including:

- If you lose your passport on holiday, simply login to your account to retrieve your scanned and authenticated copy.
- No more hunting for lost documents when you need to open an account or are changing your mortgage.
- The ability to give authorised intermediaries access to specific documents in your vault to complete the KYC authentication process, saving valuable time.
- Providing peace of mind, whether you are at home or abroad.
- A user-friendly, simple and fast solution with top levels of security built in.
- A helpdesk for your queries or uploading issues. Any issues will be resolved within 48 hours of KYCme being notified.

for Corporate Customers

KYCme is the perfect solution for customer authentication. Our smart, secure, encrypted storage exceeds KYC requirements and is AML compliant, thanks to our unique authentication solution.

The benefits of KYCme to authorised intermediaries are many, including:

- No more chasing customers around the globe to complete the KYC process.
- Your customer simply gives you access to the documents you need, saving you valuable time and money.
- The ultimate online package that saves professional time by holding Customer details and documentation securely and confidentially.
- Easily keep customer records up to date and accessed only by authorised personnel.
- The ability to improve customer service and client satisfaction.
- A helpdesk for your queries or uploading issues. Any issues will be resolved within 48 hours of KYCme being notified.

As businesses grow, data quantities increase, making it difficult to keep customer records up to date. There is also increased risk of files and information being misplaced or viewed by unauthorised personnel. KYCme helps overcome these important challenges.

KYCme plays a significant role in the fight against money laundering and terrorist financing. KYCme will continue to evolve and develop to remain one step ahead of AML and KYC legislation.
